

Project and Portfolio Management Training

WHY INTEGENT

Simple: We teach it better

Integent delivers high-value project management coaching, guidance and training to leading organizations and their project managers.

Benefits of INTEGENT Training:
Powerful and Practical

Benefits

Powerful (and practical) benefits of Integent training

Unlike many other project management training providers, Integent's project and portfolio management training solutions are practical. As a result, our clients realize measurable performance improvement and greater project success related to on-time completions and managing budget constraints. Integent provides our clients with the following unique value propositions.

Focus on Results

Students are able to apply what they learn in our courses immediately. This shortens the time-to-value for our customers and drives measurable performance improvement.

Real-World Knowledge

Integent's instructors are also consultants with many years of experience in the field of project management. Throughout the years they have helped customers from many different verticals overcome the challenges of managing projects successfully. Our instructors bring this real-world experience to every classroom, benefiting students tremendously.

Highly Experienced and Certified Project Management Practitioners

Many of our instructors are Project Management Professionals (PMPs), have passed multiple Microsoft Project & Project Server exam certifications, and have a minimum of 10 years in the project management arena.

True Integration of Best Practices and Tools

Integent is the only provider that integrates Microsoft Project training into every applicable training course, so you leave the classroom with usable knowledge and skill. Integent's practical integration of best practice processes and tools in the curriculum and delivery of every training course shortens the time-to-value of our training programs.

Student Centered Learning

Integent's courses are highly practical and interactive, and encourage active student participation via hands-on exercises, case studies, group presentations, and daily evaluations. We combine teaching our in-depth content with facilitated classroom discussion to provide students with the opportunity to share their unique experiences and knowledge, which ensures maximum absorption of new concepts and techniques.

Microsoft Project Online & Server for Administrators (1 of 2)

Course Number: MPOS104

Fee: Contact Integent

Duration: 2 days

Whether you are new to Microsoft Project Online or you have been using it for a while, very often there are individuals who want to understand some of the more common functional administrative tasks of the solution. If this is the case, then this is the course for you.

The course begins with a brief overview of the Microsoft Project Online interface, then we dive right into the Server Setting sections available in this critical tool. You'll perform various exercises that will cover everything from creating custom fields and lookup tables, creating views to meet end-user information needs, to configuring an Enterprise Project Type to facilitate project intake. Both lectures and hands-on exercises ensure your ability to more fully comprehend the material and optimize your investment.

Prerequisites

Familiarity with Microsoft Office programs, basic project management principles helpful, and some technical background helpful.

Audience

This course is for Project Administrators, Project Managers, and other users who are configuring and administering the use Microsoft Project or Microsoft Project Online in any organization.
